LINKS DEMO

Every page, one click away.

A demo document for EmbedPDF. Every blue label in it is a real link, so there is always something to click.

TRY ONE

goto

Go to page 3 →

Jumps to a page in this document.

uri

Open embedpdf.com ↗

Opens a website in a new tab.

javascript:

A script

A script address. It never opens.

CONTENTS

02 **Links to a page** Contents, cross-references, footnotes. Page 2 →

03 **You followed a link** Where “Go to page 3” lands. Page 3 →

04 **Links to the web** Websites, email, and links that never run. Page 4 →

INSIDE THE DOCUMENT

Links to a page.

A link to a page takes the reader to the exact spot it names, without leaving the document.

Long documents are rarely read front to back. A contents page, like the one on page 1, lets a reader pick a chapter and go straight there.

Cross-references do the same inside the text. The table of web links is on page 4; the page that "Go to page 3" opens is page 3.

Footnotes are links too. The number after this sentence jumps to its note at the foot of the page.[1]

The pointer turns into a hand over every link, so a reader always knows what will respond to a click.

Back to the start

The top of page 1.

The next page

The top of page 3.

A spot on a page

The table on page 4.

No mouse? Press Tab.

Tab moves from link to link. Enter follows the one you're on.

1 A footnote can point outward as well. The full guide to links lives at embedpdf.com/docs.

YOU ARRIVED

You followed a link.

This is where “Go to page 3” on the first page lands.
The view moved; nothing reloaded.

Back to page 1
Try the other links there.

Links to the web
Websites, email and scripts.

OUTSIDE THE DOCUMENT

Links to the web.

A website link opens in a new tab, after a safety check.
Every row below is a real link. Try each one.

KIND	LINK	WHAT HAPPENS
`https`	embedpdf.com ↗	Opens in a new tab.
`https`	EmbedPDF on GitHub ↗	Opens in a new tab.
`mailto`	hello@embedpdf.com	Opens your email app.
`javascript:`	A script	⃠ Never opens.

Some links never run.

A link that would run a script, start a program or open a file on your computer is never followed.
